Experience

Felt Clinic · Lead Software Engineer | 2025 – 2026

The care stack for wearables.

- Built a platform enabling multiple complex medical devices to seamlessly connect to provider networks.
- Launched two products for brands, each with an installed base of over 1 million active devices.
- Designed a unified Next.js platform layer plus comprehensive agentic scenario testing.

MDandMe · Senior Software Engineer | 2024 – 2025

Pioneering AI healthcare startup.

- Rewrote the core chat experience — a cutting-edge RAG-based medical chat app — and community features in Next.js with an emphasis on SEO.
- Increased conversion by over 200%; helped thousands of patients daily.

Freelance Consultant | 2019 – 2024

- Architected machine learning apps for complex dataset investigations in financial regulation.
- Delivered scalable, profitable KYC solutions to one of the 10 largest banks in the US, earning multiple contract renewals through high customer satisfaction.
- Maintained an active open-source project with worldwide contributors, building new features for international partners at the New Urban Mobility Alliance.
- Managed critical large-scale production database migrations (10M+ user records) from MongoDB to PostgreSQL.

Transfix · Senior Engineer, Engineering Manager | 2017 – 2019

Freight brokerage platform.

- Led a team of 10 engineers, responsible for shipment success across thousands of contracts fulfilled daily.
- Worked closely with sales to increase margins and reduce wasted miles.

Quartet Health · PCP Team Lead | 2015 – 2017

Startup connecting physical and mental healthcare providers.

- Lead Engineer for the Primary Care Physician app.
- Designed and implemented patient intake care services, clinic management, privacy safeguards, and EMR integration.

Percolate · Developer | 2014 – 2015

SaaS adtech platform for Fortune 500 brands specializing in promoted content.

- Rewrote and added new features for a customizable brand analytics platform for cross-channel ad engagement using React.js and custom graphing libraries, powering eight-figure worldwide ad campaigns.

Bit.ly · Junior Developer | 2013 – 2014

The world-famous link shortener.

- Built single-page web apps using jQuery, Backbone.js, and React, tracking click analytics for over 2% of worldwide web traffic.
